

REQUIREMENTS DOCUMENT

İclal Zeynep Kaya

Hatice Melike Aydın

Anıl Özişler

Task Matrix

İclal Zeynep Kaya	Hatice Melike Aydın	Anıl Özişler
Requirements Document	Effort Estimations	Task Assignments

Functional Requirements

1. Users must be able to create an account and log in.
2. Users must be able to input their weekly class schedules.
3. Users must be able to send pre-defined texts.
4. Users must be able to edit or delete their weekly schedules.
5. Users must be able to delete their account.
6. The system must automatically detect overlapping free time slots among students.
7. The system must be able to let students to choose among other available students.
8. The system must be able to let users to choose between dining places.
9. The system must respect user privacy and only share schedule data with explicit opt-in consent.
10. If no matching students are found system must display this information to the user.

Non-Functional Requirements

11. The project should only run in the web browser.
12. The user interface (UI) should be simple and understandable.
13. The database must store users weekly class schedules.
14. Minimum password requirements (e.g. 8 characters, uppercase letters, numbers) must be applied for Password Security.
15. Page load time must be less than 5 seconds on average.

Effort Estimations

The effort estimation for each phase is based on expert judgment and analogy with similar projects. The project is planned for a 3-person team working over 6 weeks. The estimated effort is given in person-days:

1. Requirements Gathering & UI/UX Design - 12 person-days
2. Backend and Database Setup - 20 person-days
3. Frontend Development - 25 person-days
4. Free-Time Matching Algorithm -18 person-days
5. Integration, Testing & Debugging - 20 person-days
6. Deployment & Final Documentation - 10 person-days

Total Estimated Effort: 105 person days

Team Member and Roles

Hatice Melike Aydin	Developer/Tester
İclal Zeynep Kaya	Developer/Requirement Analyst
Anıl Özişler	Developer/Project Manager

The user interface (UI) should be simple and understandable.	-	+	+
The database must securely store user data.	+	+	-
Page load time should be less than 5 seconds.	+	+	+
Minimum password requirements must be applied for security.	+	+	+

The task distribution was organized in a way that everyone takes an active role in the project development process.

All team members are expected to contribute to all aspects of the project.

- Melike and İclal takes a role in data processing and system logic.
- Melike and Anıl manages the user interface and integrations.
- İclal and Anıl takes a role in project management, documentation and testing process.

This structure balances the division of labor and allows every member to write code and be involved in management and testing processes
